

NUR ADITIYA RAMADHANI

FRONTEND DEVELOPER | UIUX DESIGNER

work.ramsy@gmail.com | +62 895 1446 3758 | <https://ramsyparker.my.id> | Tegal, Central Java

SUMMARY

Highly creative and detail-oriented Frontend Developer and UI Designer with hands-on experience building modern, scalable, and user-centric digital products. Proven ability to translate complex requirements into intuitive interfaces and high-quality frontend implementations using modern web technologies. Skilled in crafting visually consistent design systems, optimizing user flows, and delivering responsive, accessible web experiences. Adept at bridging design and engineering to ensure seamless collaboration and efficient product delivery. Seeking to leverage both technical and design expertise to contribute to innovative projects and elevate overall product experience.

SKILLS

TECHNICAL SKILL

- Javascript
- Typescript
- PHP
- Tailwind CSS
- Design System
- Wireframing
- UI Design

TOOLS

- Vercel
- Notion
- Figma
- Git/Github

SOFT SKILLS

- Communication
- Problem solving
- Time Management
- Collaboration

EXPERIENCE

Frontend Developer

Dec 2023 – Present

17Projects

- Developed responsive and high-quality frontend interfaces using React/Next.js to support client and internal projects.
- Collaborated with designers and backend developers to ensure smooth integration and consistent user experiences.
- Implemented reusable components and optimized frontend structures to improve development speed and code scalability.
- Performed debugging, UI fixes, and performance improvements across multiple pages and features.
- Utilized Git/GitHub for version control and team collaboration in an agile workflow environment.
- Ensured cross-browser compatibility and mobile responsiveness for all delivered features.

Intern UI UX Designer

July 2025 – Dec 2025

Komerce

- Contributed to the UI/UX development of Cekwa.id and Kolkit.id, focusing on improving user flows and overall usability.
 - Redesigned key interfaces and created structured product flows that helped streamline the development process.
 - Built reusable UI components, wireframes, and interactive prototypes using Figma to support cross-team collaboration.
 - Improved visual consistency across pages through layout refinements, spacing rules, and design guidelines.
 - Worked closely with developers to ensure accurate handoff and efficient implementation.
 - Participated in product discussions to identify UX improvements and solve user pain points.
-

PROJECTS

Cekwa.id & Kolkit.id by Komerce

Aug 2025

UI UX Designer | Frontend Developer

- Redesigned multiple key interfaces across the platform including dashboard, onboarding flows, and core feature pages to improve clarity, usability, and user engagement.
- Built end-to-end frontend features beyond the landing page, integrating dynamic data, reusable components, and responsive layouts using Next.js.
- Created a scalable design system covering typography, spacing, components, and interaction patterns, enabling consistent UI and faster iteration.
- Improved performance and UX through optimized component structure, code splitting, and better asset handling, resulting in smoother navigation.
- Collaborated with cross-functional teams to align design decisions with product goals and ensure seamless implementation across the system.

Futsal Booking Platform Sipelem

May 2025

Fullstack Developer (Laravel)

- Developed a full-stack web application for futsal field reservations, built with Laravel and integrated with a real-time booking system.
- Implemented Midtrans payment gateway (Snap & API) for secure online transactions, including payment status callbacks and automated order validation.
- Built an admin dashboard for managing schedules, field availability, payments, and user data with role-based access control.
- Designed and optimized the database structure to support dynamic time slots, booking conflicts, and transaction logs.
- Created responsive, user-friendly interfaces for the customer flow browsing fields, selecting schedules, booking, and paying online.

- Improved system reliability with input validation, server-side checks, and error handling to ensure smooth booking experiences.
- Deployed the application with environment configuration, storage management, and production-ready performance optimizations.

BalletMotion – AI-Powered Ballet Learning App

Feb 2025

Frontend Developer (Flutter)

- Developed the frontend of a ballet learning application using Flutter (Dart) with seamless cross-platform support.
- Integrated real-time AI pose detection into the Flutter UI, enabling users to receive instant feedback on movement accuracy.
- Built interactive lesson screens, practice modules, and progress-tracking pages with a clean and intuitive user experience.
- Collaborated with the AI/ML team to connect the app with the real-time detection pipeline while ensuring smooth frame processing on device.
- Optimized UI performance to maintain high FPS during camera streaming and AI inference.
- Implemented reusable Flutter components and responsive layouts to ensure consistent design across all device sizes.
- Enhanced the onboarding and learning flow through thoughtful UX patterns, animations, and micro-interactions.

Tegalin – Cultural & Culinary Discovery App

Feb 2024

UI UX Designer | Frontend Developer (Flutter)

- Designed the end-to-end UI/UX for a mobile app that introduces Tegal's culture, traditions, and signature culinary dishes.
- Created a clean, modern, and friendly visual identity tailored for young users exploring local heritage.
- Developed the app's Flutter frontend with smooth navigation, responsive layouts, and scalable component architecture.
- Integrated an interactive chatbot to guide users in learning about Tegal culture and culinary facts.
- Implemented image recognition features for identifying local dishes, enhancing the learning experience through AI-powered interactions.
- Designed intuitive content flows, micro-interactions, and onboarding screens to improve user engagement.
- Ensured consistent design execution across all app modules through systematic component usage and design guidelines.

EDUCATION

Applied Bachelor of Informatics Engineering

2022-2026

UNIVERSITAS HARKAT NEGERI

GPA : 3,5 / 4

COMPUTER & NETWORK ENGINEERING

2019-2022

SMK NEGERI 2 ADIWERNA

FINAL SCORE : 92 / 100
